

Rich Text Editor Function

Last updated by | David Mishler Gomocho | Mar 27, 2025 at 3:12 PM GMT+1

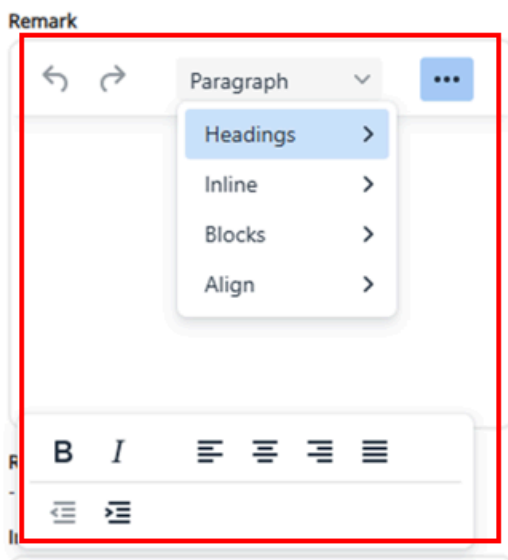

Rich Text Editor

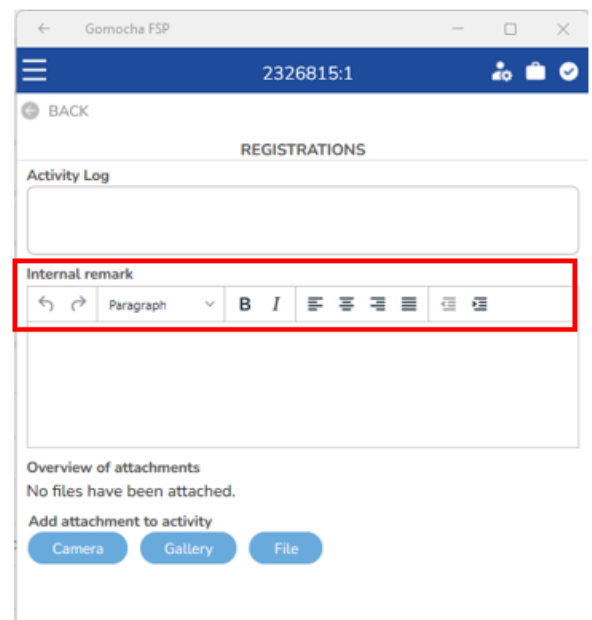

Description

The **Rich Text Editor** function allows users to enhance their dictations using familiar text formatting options—similar to those found in applications like Microsoft Word. This functionality enables improved readability and presentation of text. It is available in both the Gomocha FSP Portal and the Gomocha FSP APP.

Rich Text Editor- Gomocha FSP Portal

Rich Text Editor-Gomocha FSP APP

Value

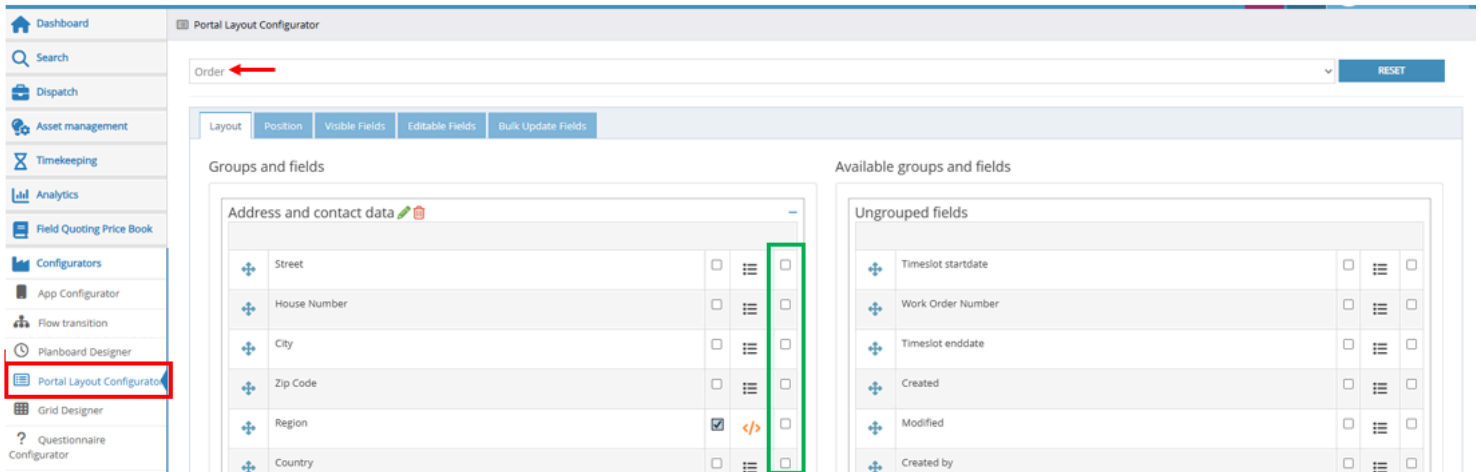

- Enhances clarity and readability of user input
- Allows professional formatting for better presentation
- Improves communication across teams and with customers

Configuration

Gomocha FSP Portal

Configurators > Portal Layout Configurator > Select screen to add Rich Text Editor function to (Example below uses **Orders) > Enable **Rich Text Editor flag** next to desired field (Example below uses **Remark** field)**

- **Note:** The Rich Text icon is not visibly labeled. It appears as the **box on the far right** of each field and only displays a label when the user hovers over it.

	Project Number	<input type="checkbox"/>		<input type="checkbox"/>
	Remark	<input type="checkbox"/>		<input checked="" type="checkbox"/>
	Reason	<input type="checkbox"/>		<input type="checkbox"/>
	Name	<input type="checkbox"/>		<input type="checkbox"/>

Gomocha FSP APP

To enable the Rich Text Editor in the Gomocha FSP App, it must be configured in the App Configurator by a Gomocha FSP Expert and is treated as a Change Request.

Configurators > APP Configurator > Select Configuration > Screen Definition > Add or Select Textarea Function Block from/to Screen Layout > Function Block Properties: Click check box **Use Rich Text Editor** > Save > Publish APP changes > Update Gomocha FSP APP on device(s) > Rich Text Editor now available

Note: Example used in images is for **Internal Remarks** on an Installation workflow.
