

Asset Management

Last updated by | David Mishler Gomocha | Jul 15, 2025 at 9:59 AM EDT

Asset Management

Description

What it is

Release 5.1.2 introduced a new dedicated portal section for all asset management features.: **Asset Management**

What it does

Consolidates asset tracking tools, information, and functions in one location for easier access.

Why it matters

Scattered asset management tools slow operations and create confusion. With a centralized asset section, users find what they need faster, streamlining their workflow.

Value

The Asset Management menu offers customers comprehensive control over their assets, delivering several key benefits:

- Speeds up access to asset information

- Reduces navigation time
- Creates logical grouping of related functions
- Gomocha Efficiencies that map to this new feature
- Simplify Asset Management
- Centralize Asset Intelligence
- Tailor Your Service Command Center

Search Assets

Opens the Search screen with the "Assets" category pre-selected for quick access to existing asset records.

Description	ID	Customer	Type	Region	Serial number	Created	Modified	Created by	Modified by
