Gomocha FSP Portal: Enhanced Search with Time-Based Filters

 43022 Portal - Search | Add time based filters, supporting last and next | Done

Description

Efficiency:

- Find Information Fast with Smart Time Filters

What it is

- Enhanced Portal Search with Time-Based Filters

What it does

- Adds intelligent date filters to Portal search, letting you quickly find records from specific time periods like "next working week," "last quarter," or "this year" without manually entering dates.

Why it Matters

- Hunting through records by typing in date ranges wastes time and invites mistakes. Smart time filters get you to the right information in seconds, not minutes. No more guessing if you typed the right date format or wondering if you missed something.

Value

- Faster data retrieval without date calculations
- Fewer search errors from manual date entry
- Improved planning with quick access to upcoming work
- Better reporting with precise time period filtering

Where it Fits in Gomocha FSP

Usage/Output

When using the Search functionality to filter by dates, the following 'Reported Date' options are now available:

- Next working week
- Last week
- Next week
- Last month
- Next month
- Last quarter
- This quarter
- Next quarter
- Last year
- Next year

New Date filters work just like existing search filters

The screenshot shows the Gomocha FSP Portal - GoDemo - Acc. interface. The 'Orders' search filter is open, displaying a dropdown menu with the following options:

- Last working week
- Last working week
- Working week
- This week
- This month
- This year
- Yesterday
- Today
- Tomorrow
- This quarter
- Next year
- Greater or equal than n days from now
- Greater than n days ago
- Less than n days from now
- Next month
- Next week
- Greater or equal than n days ago
- Next quarter
- Less than or equal n days from now
- Less than n days ago
- Last year

The interface also includes a sidebar with navigation links, a top navigation bar, and a main content area with a table of orders.

Example: Reported date **"This Year"**

Orders
